

Team Involvement in Demonstration

Date:	3 October 2026	Team ID:	UNM1611SHARVESH RAM
Project Name:	AI BlogNest API	Maximum Marks:	1 Mark

Individual Contribution & Demonstration Roles:

This document records the active participation, technical contributions, and presentation responsibilities for demonstrating AI BlogNest API.

S.No	Team Member	Role & Responsibilities	Section Presented	Contribution Summary	Status
1	Sharvesh	Lead Backend Architect	Architecture & Setup	Designed Express MVC architecture, MongoDB connection, and server lifecycle.	Active
2	Sharvesh	Security Specialist	Authentication Flow	Built salted bcrypt hashing, JWT issuance, and author-isolated authMiddleware.	Active
3	Sharvesh	Generative AI Engineer	AI Blog Generation	Engineered Gemini 1.5 Flash prompt constraints, text cleaner, and category mapper.	Active
4	Sharvesh	NLP & Summarization Lead	AI Blog Summarizer	Implemented content summarization controller and prompt pipeline.	Active
5	Sharvesh	Database Engineer	Blog CRUD Lifecycle	Authored Mongoose User and Blog schemas with populate references.	Active
6	Sharvesh	QA & Test Automation	Thunder Client Demo	Constructed 10-endpoint automated Postman collection and load benchmarks.	Active

Team Coordination & Evaluation Notes:

Team Leader / Coordinator:	Sharvesh
Overall Team Coordination Rating:	5.0 / 5.0 (Exemplary)
Issues Encountered During Demo:	None. All endpoints executed with 100% test pass rate in Thunder Client.
Resolution & Contingency Planning:	Comprehensive pre-demo verification against live MongoDB Atlas cluster; backup collection pre-configured.
